

# Renato 7750/7753 Movements Quickset

## Date Change Instructions

**\*\*Important Note: If the following procedure is not practiced before every manual date change you will damage your timepiece. \*\***

- 1) Unscrew crown until you feel it release.
- 2) Pull crown to 2<sup>nd</sup> position.
- 3) Turn your crown clockwise, your hour and minute hand must go around a 24 hr. period or past the 12 o'clock until the date changes on its own(Both hour and minute hand must pass 12 o'clock).
- 4) Once you have reached the 12 o'clock and your date has changed automatically you will turn your minute hand clockwise to the 45 minute position.
- 5) Once you have completed this procedure, push your crown in towards the case until it releases all positions.
- 6) Pull your crown to the 1<sup>st</sup> position.
- 7) Turn crown clockwise for quickset date.
- 8) Turn crown counter clockwise for quickset day of week.
- 9) Once date is completely set you will want to set your time by pulling your crown out to your 2<sup>nd</sup> position. (Please keep in mind that your time should already be in AM hours should you need to set to PM you must pass 12 o'clock one more time).
- 10) Once all is set push your crown in towards the case to release all functions, let go of the crown then proceed by pushing and holding the crown in towards the case and turning counter clockwise until tightly closed.
